Country of export: Estonia

This permit includes the following good(s). Refer to the indicated page for details of the permit conditions:

1. Fertiliser
   Description: Biostimulant Albit liquid paste
   End use: Fertiliser
   Country of origin: Russian Federation
   Permit Conditions: Products for environmental use, plant fermentation based, not on an animal carrier

NOTE: Where a good has more than one set of permit conditions please read each set to determine which set of permit conditions applies to a specific consignment.

----------------------------------------- End of commodity list -----------------------------------------

This permit is granted subject to the requirement that fees determined under section 592(1) are paid.

Nathan Jamieson
Delegate of the Director of Biosecurity

Date: 20 February 2019
Important information about this permit and the import of goods

Note: This permit covers Department of Agriculture and Water Resources biosecurity requirements. It is your responsibility to ensure all legal requirements relating to the goods described in this import permit are met. While you should rely on your own inquiries, the following information is provided to assist you in meeting your legal obligations in relation to the importation of the goods described in this import permit.

Authority to import
You are authorised to import the goods described in this import permit under the listed conditions.

Compliance with permit conditions and freedom from contamination
All imports may be subject to biosecurity inspection on arrival to determine compliance with the listed permit conditions and freedom from contamination. Imports not in compliance or not appropriately identified or packaged and labelled in accordance with the import conditions they represent may be subject to treatment, export or destruction at the importer’s expense, or forfeited to the Commonwealth.

Compliance with other regulatory provisions
Additionally, all foods imported into Australia must comply with the provisions of the Imported Food Control Act 1992, and may be inspected and/or analysed against the requirements of the Australia New Zealand Food Standards Code.

All imports containing or derived from genetically modified material must comply with the Gene Technology Act 2000.

It is the importer’s responsibility to identify and ensure they have complied with all requirements of any other regulatory organisations and advisory bodies prior to and after importation. Organisations include the Department of Immigration and Border Protection, the Department of Health, Therapeutic Goods Administration, Australian Pesticides and Veterinary Medicines Authority, the Department of the Environment, Food Standards Australia New Zealand and any state agencies such as Departments of Agriculture and Health and Environmental Protection authorities. Importers should note that this list is not exhaustive.

Change of import conditions
Import conditions are subject to change at the discretion of the Director of Biosecurity. This permit may be suspended or revoked without notice.

Notification of import
Notification of the import must be provided to the Department of Agriculture and Water Resources for all imported goods other than goods imported as accompanied baggage or goods imported via the mail and not prescribed under the Customs Act 1901. Notification must be consistent with the Biosecurity Regulation 2016.

Valid import permit
The importer must hold a valid import permit when the goods are presented for clearance.

The importer must verify that an import permit has been issued in relation to the consignment by one of the following means:

i. The positive identification of the import permit to the Department of Agriculture and Water Resources at the time that the goods are being processed for biosecurity clearance, such as by presenting the import permit.

OR

ii. Any form of physical, digital or verbal correspondence presented with information that allows an import permit to be identified.

Provision of required documentation
All required documentation must accompany each consignment. Alternatively, necessary documentation will need to be presented to the Department of Agriculture and Water Resources at the time of clearance. In order to facilitate clearance, airfreight or mail shipments should have all documentation securely attached to the outside of the package, and clearly marked "Attention Department of Agriculture and Water Resources". Documentation may include the import permit (or import permit number), government certification and invoice.

If the product description on the import permit varies from the identifying documentation provided for clearance, the importer is responsible for providing evidence to the biosecurity officer that the import permit covers the goods in the consignment.

Any documentation provided must comply with the Department of Agriculture and Water Resource’s minimum documentation requirements policy.
Permit conditions

It is the importer’s responsibility to ensure that the following permit conditions are met in relation to each consignment. Where more than one set of permit conditions is shown for a good please read each set of conditions to determine which applies to a specific consignment.

1. Products for environmental use, plant fermentation based, not on an animal carrier

This section contains permit conditions for the following commodity (or commodities):

<table>
<thead>
<tr>
<th>1.</th>
<th>Fertiliser</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Product Description: Biostimulant Albit liquid paste</td>
</tr>
</tbody>
</table>

### 1.1. Biosecurity Pathway

- **a.** These conditions allow for the import of the following products only:
  - Biostimulant Albit liquid paste

- **b.** Each consignment must meet all of the specified requirements.
  
  To demonstrate compliance with this requirement you must present the following on a Manufacturer's declaration:

  1. The sourcing of raw materials and method of manufacture have not changed since information was supplied to the department in support of the import permit application; and

  2. The species (including subspecies, serovar or any other classification) of microorganisms used to manufacture the product have not changed since information was supplied to the department in support of the import permit application; and

  3. *Pseudomonas marginalis* pv alfalfa and pv pastinacae (*Pseudomonas fluorescens* biovar II in part) and *Bacillus megaterium* pv cerealis are excluded from these formulations; and

  4. No ingredients of animal origin have been used at any stage of manufacture of the product; and

  5. All culture media components used in manufacture of the product contained no animal derived material. This includes culture media components used to propagate microorganisms and/or to produce derivatives of fermentation; and

  6. The culture media has been subjected to sterilisation prior to inoculation; and

  7. The only plant derived materials that may be present in the final product are highly refined and processed plant extracts and oils/plant material; and

  8. The product contains no whole seeds or viable plant material; and

  9. The product has been protected from post-processing contamination; and

  10. The product has been packaged in new and clean containers or bags only; and

  11. Mineral and metal ores (including rocks and sand) that may be present in the final...
product are clean and free of extraneous materials; and

12. The manufacturing premises is operated according to appropriate standards of Good Manufacturing Practice (GMP) applicable to production of sterile fermentation products, including appropriate standards for prevention of cross-contamination of production cultures, and quality control.

The declaration must be provided by:

Albit Scientific and Industrial Limited Liability Company (Albit LLC)
2, Prof. Vitkevich st.
Pushchino, Moscow, 142290,
Russian Federation.

c. The department does not approve the importation of the product unless it has been manufactured in accordance with the criteria outlined above.

d. Contravention of import permit conditions may have serious consequences for importers including seizure of goods or pecuniary penalties.

e. Any change to the manufacturing process for the product that affects the criteria outlined above must be the subject of a new import permit application and assessment process. Alternatively import permit holders may apply to the department for an amendment to this import permit. At the end of the assessment process a decision will be made as to whether conditions may be applied to the importation of the product that limit the level of biosecurity risk to one that is acceptably low.

f. The product is for use as a fertiliser only.

g. These conditions prohibit the goods being distributed, sold or used for pet food, stock feed or aquaculture feed unless approved by the Department of Agriculture and Water Resources in writing for specific alternative uses.

h. **Commercial administrative conditions**

Documents must be provided with each consignment which:

1. identify the consignment (if non-personal) e.g. entry number
2. identify all goods being imported as part of this consignment e.g. invoice or waybill or importer’s manifest
3. describe the goods being imported (where not clear).
   
   e.g. 1: Product XRab = Purified protein derived from rabbits
   e.g. 2: Product AX = Synthetic antibiotic
   e.g. 3: Comte = Cheese.

i. Under the **Biosecurity Charges Imposition (General) Regulation 2016** and Chapter 9, Part 2 of the **Biosecurity Regulation 2016**, fees are payable to the Department of Agriculture and Water Resources for all services. Detail on how the department applies fees and levies may be found in the **charging guidelines**.

j. In addition to the conditions for the goods being imported, non-commodity concerns must be assessed including container cleanliness, packaging and destination concerns, and may be subject to inspection and treatment on arrival. Please refer to the BICON Non-Commodity Cargo Clearance case for further information.
